Your skin's glow, smoothness, and bounce all depend on collagen. But as collagen declines, skin starts to look dull, tired, & less firm.

FINE LINES

Supports collagen to help soften the look of fine lines and smooth skin texture.

DULL SKIN

Encourages renewal at the surface for a fresher, more radiant-looking complexion.

PIGMENTATION

Helps even out the appearance of tone for a more uniform, balanced look.

REDNESS

Calms the look of stressed skin, helping it appear more soothed and even.

SCARRING

Supports the skin's natural repair process to soften the appearance of scars

ENLARGED PORES

Helps firm the look of skin so pores appear smaller and more refined.

SIMPLE. PRECISE. EFFECTIVE.

How To Use The GHK-Cu Micro-Infusion System.

Follow these steps for safe, effective results.

Assemble

01

Attach the 24K needle head to the GHK-Cu vial. Give it a little shake and leave upside down for 2 minutes.

Prepare

02

Cleanse your face and pat completely dry. Do not apply any skincare or product before treatment.

Perform

03

Hold vertically and gently start stamping the center of the face and work outward. Face, lips & body.

Finish

04

Detach the vial and apply any remaining serum over the treated area. Dispose of the needle head after use.

FOR BEST RESULTS

For maximum results, apply VEAUTY GHK-Cu Topical Night Serum every night between treatment days to maintain continuous peptide and collagen activity.

THE SCIENCE BEHIND THE RESULTS

Two Proven Technologies. One Treatment.

The VEAUTY GHK-Cu Micro-Infusion Kit works at two levels simultaneously, combining over 50 years of peptide science with the clinically proven power of microneedling.

THE SERUM

GHK-Cu: 50+ Years of Skin Science

GHK-Cu is a naturally occurring peptide found in human plasma. Decades of research have confirmed its remarkable ability to activate the skin's own repair systems, stimulate collagen and elastin production, and reset genes associated with aging.

- Stimulates collagen and elastin synthesis, visibly firming and plumping the skin
- Activates skin repair genes, accelerating recovery and reducing fine lines
- Powerful antioxidant protection, neutralising free radicals that accelerate ageing
- Reduces inflammation and supports the skin barrier for a healthier complexion

• Studied for over 50 years. GHK-Cu has been shown to influence over 4,000 human genes related to skin repair and regeneration.

THE STAMP

Microneedling: Your Skin's Collagen Switch

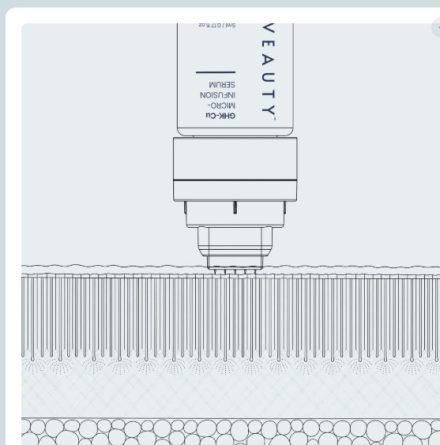

Microneedling works by creating thousands of controlled micro-channels in the skin. This triggers the body's natural wound-healing response, flooding the area with growth factors and signalling the skin to produce new collagen and elastin.

- Triggers natural collagen and elastin production through controlled micro-injury
- Improves skin texture, tone and firmness with each treatment
- Reduces the appearance of fine lines, pores and uneven skin tone
- Creates micro-channels that increase active ingredient absorption by up to 80%

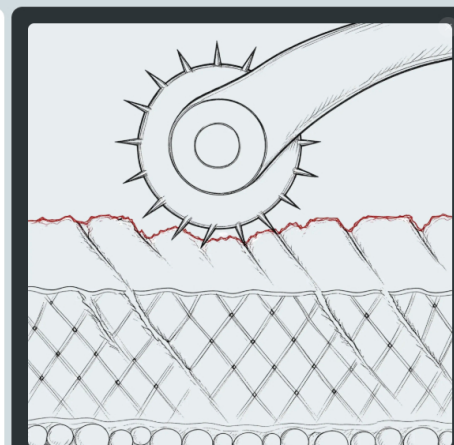

• Microneedling is a clinically validated treatment used by dermatologists worldwide to stimulate collagen and reverse visible signs of ageing.

WHY IT MATTERS

Micro-Stamping vs Rolling

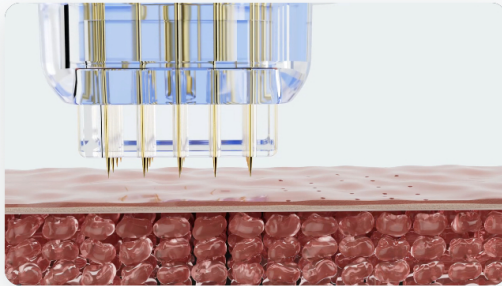

VEAUTY Micro-Infusion Stamp

Standard Derma Roller

- ✓ Clean, precise micro-channels with no tearing
- ✓ Minimises trauma, shorter recovery
- ✓ Full control over pressure and placement

- ✗ At an angle, causing tearing and damage
- ✗ Dragging motion increases inflammation
- ✗ Higher risk of infection and bleeding

THE COMBINED EFFECT

Painless.
Sterile. Safe.

VEAUTY GHK-Cu uses one time use, 24 Karat gold 0.5mm needles to ensure a safe and comfortable treatment.
